Research Interests

I am currently a Postdoctoral Researcher at the University of Stuttgart, Germany. My research revolves around the field of Immersive Analytics: the use of virtual and/or augmented reality technologies to support visual data exploration and presentation. More specifically, I investigate and design techniques for optimising the display of data visualisations within real-world environments—also known as situated visualisation. My research has also drawn on the fields of computer-supported collaborative work, data-driven storytelling, tangible user interaction, and hybrid user interfaces.
